## **DETAILED ACTION**

### ***Withdrawal of Allowable Subject Matter***

The indicated allowability of claim 9 is withdrawn in view of the newly discovered reference(s) to BRIGGS. Rejections based on the newly cited reference(s) follow.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no support in the specification for the inner walls of the frames having slots reducing openness of the channel or the inner lip having a width less than half the spacing between the frames.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the walls having slot and the reduced width channel must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, it is not clear what the third frame extends around (i.e. the first frame, the second frame, the circumscribing area? What?).

Regarding claims 16, it is not clear what is intended by "the third piece frame configured to fit against and form with one of the aforesaid frame members "a second frame" in which said one of said frame members forms one side of said second frame". Please clarify.

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 9,23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #6,272,801 to SUH. Regarding claims 9 and 23, SUH discloses a frame including first (130) and second (140) integral plastic, column 4, lines 51-52, area circumscribing frame members that fit against one another, see figures 8 and 10, defining an article retaining channel (132) in which at least one of the frame members (130,140) is further formed to fit against a third one piece integral frame member (150) to form a second support frame having an article retaining channel (not shown) formed by placement of ridges 9151b) thereagainst. SUH discloses the basic claimed frame except for explicitly detailing molded. Although SUH is silent in this regard, the applicant is reminded that molding is a method of forming something. Thus, the step or provision of being molded has not been given patentable weight. Even as such, it would have been obvious to one having ordinary skill in the art at the time the invention was made to select a known material suitable for the use intended as an obvious matter of design choice. For instance if the window is being exposed significantly to the external environment then perhaps plastic is best fit for use. However, if the windows are internal with little to no outside exposure to the environment, perhaps metal would be suitable. Regarding claim 24, SUH further discloses the use of inwardly projecting lips 9131,141). It too would have been obvious to one having ordinary skill in the art at the time the invention was made to select the spacing of the inwardly projecting lip (131,141).

***Allowable Subject Matter***

Claims 20 and 22 are allowed.

Claim 16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
